EDUCATION

University of Alberta

Bachelor of Science, Computing Science

- **Achievements:** International Undergraduate Scholarship worth \$5000

Dec 2028

Edmonton, AB

EXPERIENCE

Alberta Machine Intelligence Institute · AI4Good Lab, Mila

May 2026 - Present

AI Software Developer Intern

Edmonton, AB

- Built a production full-stack AI application in a team through applied machine learning internship program, shipping TypeScript and Next.js code with modular service-layer architecture to address a real-world nutrition and budgeting challenge
- Collaborated in a team environment using industry Git workflows, feature branching, code review, and agile sprint planning to deliver a functional multi-agent system from requirements through deployment
- Participated in bug triage and metrics review to monitor performance and ensure high-quality production-ready code
- Delivered production-ready components under direction from senior engineers, applying software design principles to maintain code quality and scalability

Dell Technologies

Oct 2025 - Mar 2026

Soar With Mentor Program- Mentee

Remote

- Expanded professional and technical skills by collaborating with Dell mentors and peers to explore software engineering career pathways and deepen understanding of data structures, algorithms, and software design principles
- Evaluated and provided feedback on innovative gaming and technology projects as a Volunteer Judge for the Girls who Game program by encouraging problem-solving and teamwork among young women in STEM

Computing Councils of Canada

Oct 2025 - Present

Director of Women in Tech Council

Remote

- Led nationwide initiatives across 10+ Canadian universities, impacting 1,000+ students to promote inclusion and support women in tech
- Organized and facilitated national-level events addressing challenges and opportunities in computing careers

PROJECTS

VitalByte VitalByte

May 2026 - Present

- Built a full-stack AI-driven blood analysis system using Next.js, TypeScript, and React, delivering a REST API that ranks recipe options by cost and dietary restrictions based on users' blood work abnormalities
- Designed a modular multi-agent service architecture with interchangeable language model backends, session-scoped preference repositories, and validated REST endpoints, enabling clean separation of concerns and parallel feature development

Android Mobile Application [Android Mobile Application](#)

Jan 2026 - Apr 2026

- Developed a lottery-based event management app in Android Studio using Java and Firebase Firestore, implementing real-time waiting list management, lottery draws, invitation workflows, and replacement selection logic
- Designed and collaborated on organizer tools with GitHub version control, including entrant management, no-show tracking, CSV export, and Material Design UI components built from Figma mockups

LEADERSHIP

Dell Technologies

Oct 2025 - Mar 2026

Soar With Mentor Program - Mentee

- Expanded professional and technical skills by collaborating with Dell mentors and peers to explore software engineering career pathways and earn the Proven Professional GenAI Foundations Dell Course as an Engagement Prize Winner
- Evaluated and provided feedback on innovative gaming and technology projects as a Volunteer Judge for the Girls who Game program by encouraging problem-solving and teamwork among young women in STEM

Undergraduate Association of Computing Science

Oct 2025 - Present

Vice President Finance

- Built strong financial literacy and budgeting expertise by managing end-to-end finances for a 1,200+ member student association
- Administered hosting and web-service accounts like DigitalOcean and NameCheap, ensuring timely payments and secure credential management

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, SQL (SQLite, PostgreSQL), C, HTML/CSS

Developer Tools: Git, GitHub, Version Control, Android Studio

Frameworks and Libraries: Next.js, React, LangChain, Streamlit, Pandas, NumPy

Fundamentals & AI: Data Structures, Algorithms, Software Design Principles, Artificial Intelligence, Machine Learning
